ROUND
OCK
EFUSE

Newsprint, magazines, milk jugs, soda, water,
plastic bottles, steel, tin cans, and aluminum.

PLEASE HAVE RECYCLABLES CURBSIDE BY 7:00 A.M.

The following items will not be collected:
Glass, cardboard and juice boxes.

Please note that items that will not be collected found in your recycle bin will be discarded in your garbage container. This may happen before or after your garbage collection.

Thank you for doing your part. Any questions please call 255-4980.

REASONS FOR EXCLUDING GLASS FROM CURBSIDE RECYCLING PROGRAMS

- Glass breaks; broken glass contaminates all other recyclable; broken glass also causes recycling equipment to wear down faster.
- Glass slows down productivity in Material Recovery Facilities (MRF's) which drives up the cost of recycling.
- Most injuries in recycling plants are caused by glass cuts.
- Glass is made from silica. Silica is the most common mineral on earth. Why are we trying to recycle something that is available everywhere? Glass has little or negative value.
- We should use our recycling systems to serve non-renewable resources like paper, plastic and metal not sand (silica).
- Glass processing plants are mostly out of state. Silica processing plants are local.
- Glass is inert. It has no reactivity and produces no methane or leachate. This is the type of material that is best to landfill.

RECYCLING

PAPER: All newspapers, including inserts such as ads or coupons, are recyclable. Please place in bottom of bins to prevent from being blown away. If raining, please cover with plastic to prevent damage, or wait until the next week as wet newspaper cannot be picked up or recycled. No phone books or envelopes are permitted.

ALUMINUM CANS: Beverage cans only (beer and soda). Please, no aluminum foil or pie pans.

STEEL FOOD CANS ONLY: Please rinse and remove labels.

PLASTIC DRINK BOTTLES: Clear or opaque plastic drink containers with the number “1 PETE” or “2 HDPE”, which hold drinks like milk, soda water, etc. are recyclable. No colored plastic containers or containers which held laundry detergent or chemicals.

USED MOTOR OIL: Used motor oil from resident’s automobiles, lawnmowers, lawn care equipment, etc. will be collected as part of Contractor’s normal residential curbside recycling collection.

Residents should contact Contractor to request a one (1) gallon oil recycling container which will be delivered by the Contractor. Residents should place their used motor oil and oil filter in the container (do not place used oil filters in the trash). Used motor oil containers should be placed at the curb next to the recycling bin on the day of scheduled collection. Contractor’s recycling truck will collect the used motor oil container along with all other recycling materials and deliver the used motor oil to a used oil collection center located at Contractor’s facilities. After the used motor oil container has been collected by Contractor, another used motor oil container will be delivered to a resident upon their request.

GLASS SHALL NOT BE ACCEPTED AND SHALL BE TREATED AS NORMAL WASTE.
(Individuals may dispose of glass products at Ecology Action in Austin, located at 8th and I-35. This is a free service to individuals.)
